MOVE

WAREHOUSE
MANAGEMENT SYSTEM

The warehouse management system is the best tool. In work, management helps increase warehouse efficiency and can support all types of warehouses such as spare part warehouse, cold storage warehouse, distribution center since the product is received check products, move products, check products, issue goods, location search record accurate information.

User Management
Location Control
FIFO, LIFO, FEFO, Expired
Received Goods
Transfer
Inventory Control
Picking & Delivery
Auto Generate Tag
Document & Reports
Support Handy Terminal

The warehouse can store products in the area that is most appropriate. This will help reduce the amount of stock in stock expired and minimum products in stock help reduce waste reduce unnecessary work process. When production decreased, profits increased.

Our system has a generate tag system which can work in conjunction with handy terminal to reduce errors human.

There is a stock card report that will help you send information to the accounting department accurate.
